DETAILED ACTION

Claims 1-4,7,10-13,15-20,26, and 35-40 have been considered. A Restriction Requirement is present.

5

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-4,7,13,15-20,26,35-37, and 39-40 are drawn to a "data protection processing device that encrypts a bit stream for a protection of data security" (claim 1, lines 1-2) in a communication system, classified in 380/255 (Cryptography: Communication System Using Cryptography).

10 II. Claims 10-12 and 38 are drawn to a modem in which compression of data and decompression of data is enacted in a communication system, classified in 380/269 (Cryptography: Communication System Using Cryptography: Having Compression).

The inventions are distinct each from each other because:

15 Inventions I and II are related as subcombinations disclosed as usable together in a single combination. Inventions in this category are said to be distinct if it can be shown that they can be separately usable. In the instant case, invention I has separate utility because it can be used in a system in which a bit stream is encrypted for a protection of data security.

20 Because the inventions are distinct for the reasons given and have acquired a separate status in the art as evidenced by their separate classification, restriction for examination purposes is proper. A complete response to this requirement must include an election of the invention to be examined even if the requirement is traversed.

Conclusion

25 A shortened statutory period for response is set to expire one month (not less than 30 days) from the mail date of this letter. Failure to respond within the period for response will result in ABANDONMENT of the application (see 35 U.S.C. 133, MPEP 710.02, 710.02(b)).
